

The programme “Wheel We Meet? Make It Wheel!” aims at raising the public awareness of environmental accessibility for promoting true social inclusion. It would be an immersion programme which would combine two signature on-going activities organized by a non-profit social initiative in Hong Kong called Wheel Power Challenge, namely “Wheel We Meet?” (an experiential activity of traveling around the community using wheelchairs along with accessibility mapping) and “Make It Wheel! Make It Real!” (a design-thinking workshop for wheelchair design). More information and the latest updates can be seen in our Facebook page: <https://www.facebook.com/wheelpowerchallenge/>
